

SIVA DHARMALINGAM

SOFTWARE DEVELOPER

Pochampalli, Krishnagiri, Tamil Nadu, India, 635204 | +91 82201 45114 | imsiva32@gmail.com | [LinkedIn](#) | [GitHub](#)

SUMMARY

B.E. Computer Science graduate and Software Development Intern with hands-on experience in Java, Python, and full-stack web development (Spring Boot, Flask, React.js). Built 4+ end-to-end projects spanning REST APIs, relational and NoSQL database design, and responsive frontend interfaces, including an AI/ML-based disease prediction system. Collaborative team player with a track record of translating client requirements into working features.

TECHNICAL SKILLS

Languages: Java, Python, C, JavaScript

Frameworks: Spring Boot, Flask, React.js

Databases: MySQL, MongoDB

Tools & Platforms: Git, GitHub, REST APIs, Visual Studio Code, Eclipse IDE, MongoDB Compass, MySQL Workbench, Postman-style API testing

Other: Artificial Intelligence (fundamentals), Prompt Engineering (fundamentals)

EXPERIENCE

Software Development Intern | RyniXsoft

Apr 2026 – Jun 2026

- Built and maintained backend modules for a Flask-based web application, contributing to REST API endpoints used by the core client-facing product.
- Debugged and resolved software defects across the codebase, improving module stability through systematic testing before release.
- Collaborated with a cross-functional development team to translate client requirements into working features, participating in daily standups and code reviews.
- Worked directly with REST APIs and backend services to support integration between frontend and data layers.

PROJECTS

Digital Task Management System

Jun 2024 – Aug 2025

- Built a full-stack task management web app with Flask, React.js, and MongoDB, supporting create, update, delete, and status-tracking workflows for task records.
- Designed REST API endpoints connecting the React.js frontend to the Flask backend, enabling real-time task status updates across the UI.
- Structured MongoDB collections and queries to support efficient CRUD operations as task volume scaled during testing.

Alzheimer's Disease Prediction using Transfer Learning

Oct 2023 – Apr 2024

- Developed a disease-prediction system applying transfer learning to medical imaging data, improving on training-from-scratch baselines for classification.
- Built an image preprocessing pipeline and a MongoDB-backed frontend to store and retrieve prediction results per scan.

Hostel Gate Pass Management System

Dec 2022 – May 2023

- Developed a gate pass management system in Spring Boot with user authentication and a multi-step approval workflow, digitizing a manual paper-based process.
- Designed a MySQL schema to securely store and manage student records and gate pass history.

Personal Portfolio Website

Jan 2026 – Mar 2026

- Built a responsive personal portfolio using HTML, CSS, JavaScript, and React.js to showcase academic background, technical skills, and project work.
- Implemented a component-based UI architecture for smooth navigation and consistent styling across devices.

EDUCATION

B.E., Computer Science and Engineering | Coimbatore Institute of Engineering and Technology

2026

- Aggregate: 76.0%

Higher Secondary Education (Class XII) | Sri Ramakrishna Matric Higher Secondary School

2021

- Aggregate: 87.8%

SSLC (Class X) | Sri Ramakrishna Matric Higher Secondary School

2019

- Aggregate: 88.2%

CERTIFICATIONS

- Full Stack Development with Java — LeSuccess Training Institute (2025)
- Fundamentals of Deep Learning — NVIDIA | Frontend Development — Great Learning
- Database Management Systems, Python, C Programming — Infosys Springboard

ADDITIONAL

Achievements: Inter-College Hackathon participant (2022); led volunteer activities under the National Service Scheme (NSS)

Languages Known: Tamil (Native), English (Professional Working Proficiency)
